Camera-Slider-System

The perfected in every details „dolly“

Product details

Length up to 4m.

Completely manufactured in Germany, assembled and tested prior to shipping.
High product standards assure a professional result!

With our camera-slider system you are able to mount the camera in a few seconds.
You can screw the rail fast and directly onto your existing tripod, place it on the ground or otherwise (e.g., mounted in front of a car, between two trees etc.)

www.com-videoshop.de

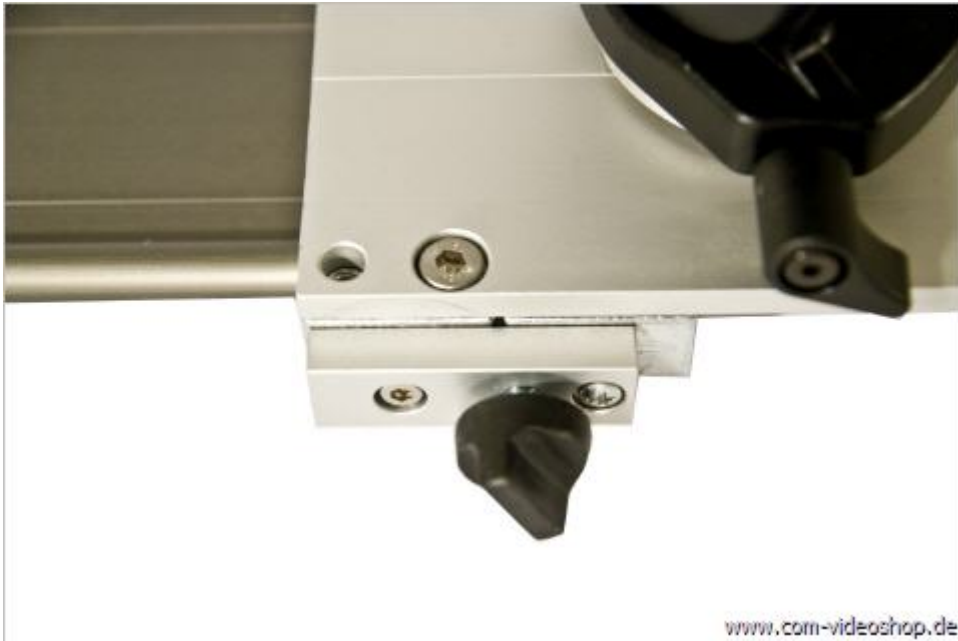

The camera-slider system is safer than a dolly, because it embraces the rails, and even if put in tilt it can't slip off. This allows new camera moves.

You can also shoot in frog perspective without a long conversation.

If you want to fix the Camera-Slider on the rail, simply tighten the "braking-screw". Clamping takes place via friction (depending on the clamping force).

With its low weight, robust design and the very rapid development it is a slider for any kind of shots: in the mountains, nature photography, sports photography with fast pans, perfect shots with camera motion, ...

By locking the special "braking-screw", you can use the Camera-Slider-System as a "mini-crane".

You can use the Camera-Slider-System on your tripod socket (red thread) or with the quick release plate of your tripod head (green thread).

Technical specifications

- Length of rails: up to 4m on request.
- Many threads for many possibilities: You get 2 more wishes or threaded holes for free! (Please specify with your order, preferably with a sketch.)
 - RAIL: On every outer end (right and left) 1x 3/8 inch tripod-socket and 1/4 inch camera thread for the quick release plate.
 - RAIL: In addition, middle 1x 3/8 inch tripod thread and 2x (above and below the 3/8 inch socket) 1/4 inch camera thread
 - SLIDER: Centered on the slider is a 3/8 inch thread to assemble a tripod head (screw not included)
 - SLIDER: Centered on the slider there is also a hole for a 1/4 inch screw to attach your camera directly on the slider.
 - Individual or nor drilling, milling & threading of all sizes we produce for you (on request)
- Only about 1,5 kilograms per meter (without the "car"/ slider)
- System is designed for camera and tripod head up to 5kg. For longer systems, you should support on both sides (e.g. a 2m Camera-Slider-System should be carried on both sides and maybe by an additional centered support, depending on your camera).
- Specially marked threads: The tripod mount it is red (3/8 inches) and the camera threads are green (1/4 inches) marked

- Rail on both sides closed, easy to open with 2 screws- length of the car (Slider): 150mm, length of the rail depending on you order

- Rail width: 80mm.

New perspectives

With our camera-slider system, you create great tracking shots - **without rebuilding the camera a long time** to a dolly! You can generate with the maintenance system smooth rides and with a tripod head smooth panning. The special design creates less resistance, that you need a very small effort for the movement. This will avoid jerky movements.

Request-system

- You can choose your camera slider system in any desired length (up to 4m). You can also purchase the Camer-Slider-System in any intermediate length. With long sliders we drill additional screws for free (for having the chance to mount on maximum 5 tripods). Please contact us for a quote in advance.
- You can order your Camera-Slider-System with any standard tripod head, or retrofit quickly and easily another tripod head with a 3/8 inch thread (screw not included). We are happy to make an attractive offer for an alternative video tripod head that you could not find in our shop. We recommend high quality products from Manfrotto.
- You can use the Camera-Slider-System on every tripod with the help of different threads (with 1/4 inch camera-screw on the tripod head, with a 3/8 inch screw directly on your tripod socket). You can order a tripod too

We are looking forward to making you a good offer!

Parts & Upgrades

In our online shop you can buy individual components and upgrades, which you can directly add to your order. For example a measurement system to determine the exact position of the slider.

For more details please visit our online shop: www.com-videoshop.de

We drill holes and mill threads to customer specifications. You have the possibility of receiving two additional holes or threads for free.

Applications

Camera-crane (with tripod head or "ballpoint"): *Mount the slider on your tripod head and use it as a small camera-crane*

Up and down (with tripod head or "ballpoint"): *You can drive the camera up and down by tilting your Camera-Slider-System by 90°*

Tripod heads and prices

You can **mount any standard tripod head with a 3/8 inch thread** on our Slider. In addition, **you can attach a camera without a tripod head directly on the Slider** (1/4 inch screw included). A tripod head is not included.

We recommend the MA 700RC2 tripod head, which you can buy in our shop. The tripod head is with its 600g the optimum combination of weight and comfort.
